Introduction

I'm a recent software engineering BSc graduate from Reykjavík University.

moved to Rennes, France in the summer of 2016.

I am looking for a job where I can make use of the knowledge acquired during my studies and gain some professional experience.

I am interested in all aspects of web development and hope to be able to make some part of it my profession in the future.

Education

BSc Software Engineering / August 2013 - January 2017

Graduated from Reykjavík University in January 2017 with an average grade of 9.32. I finished two years in Financial engineering before switching to Software Engineering, so I have a basic knowledge in Finances.

Courses/grades:

Data Structures/8.5	Computer Architecture/10	Operating Systems/10
Algorithms/9.5	Software Engineering I/9.5	Software Engineering II – Testing/10
Computer Networks/9.5	Web programming/9.5	Programming Languages/9.5
Software Requirements and design/9.5	Data processing/9	Practical Project I & II/10 & 9.5
Theory of Computation/9.5	Web-Programming/9.5	Calculus I & II/ 9.5 & 9
Mathematics III/9	Statistics I & II/9.5 & 9	Physics I & II/9 & 9

Experience

Borgarverk

Independent Software Developer / January 2017 – April 2017

Developed an Android application for Android tablet using Xamarin.Forms. The application was written in C# and Xaml.

LS Retail

Thesis Intern / September – December 2016

For my final project in Reykjavík University I developed a mobile Application (LS Fuel) using C# and Xamarin Forms. My team consisted of three female Software Engineering students and we received the highest grade in the course (9.5).

Fjarvakur

Payrole officer / Mai 2014 – August 2014

My job was to calculate and handle salaries for pilots and co-pilots for IcelandAir. I used Microsoft Excel and Outlook daily.

Skills

- *Front-end development:*
 - Proficient in HTML and CSS.
 - Proficient in Javascript and jQuery
 - Proficient in React, Redux and React Router.
 - Intermediate experience with Sass css-preprocessor.
 - Experimented with different CSS frameworks such as Bootstrap, Material UI and Semantic UI
 - Basic understanding of Angular4, currently studying.
 - Intermediate experience with cross-platform app development using Xamarin.Forms (C# and Xaml).
- *Back-end development:*
 - Intermediate experience with NodeJs and Express.js
 - Proficient with noSQL databases like MongoDB and Firebase.
- *Other skills:*
 - Intermediate experience in software testing using Mocha and Chai.
 - Proficient with Git version control.
 - Good experience in working remote.
 - Experience in agile methodologies such as Scrum and KanBan.
 - Is

Languages

My native language is Icelandic. I can speak, write and understand English very well and I can read both French and Danish. I am taking French lessons so my French is constantly improving.

Awards and Acknowledgements

Dean's List / Reykjavík University / January 2015 / Grade: 9.3

Dean's List / Reykjavík University / September 2016 / Grade: 9.7

Google Developer Challenge Scholarship to the Front-End Web Developer track on Udacity.com.
